

2–3.07.2026, Krakow, Poland

**10th Central European
Congress of Life Sciences
EUROBIOTECH**

**Sponsorship
and Exhibition
Offer**

Dear Colleagues,

We cordially invite you to the upcoming 10th anniversary Central European Congress of Life Sciences EUROBIOTECH 2026, which will be held on 2-3 July 2026 in Kraków, Poland.

EUROBIOTECH has solidified its reputation within the academic life science community in Central Europe. Since its inception in 2007, the event has grown to encompass not only academic discussions, but also an exhibition featuring biotechnology companies. Following the successful introduction of sessions focused on commercial research in previous editions, these will be extended this year. By bringing together experts from academia and the commercial sector, the congress aims to foster the advancement of translational research.

The 10th EUROBIOTECH Congress will unite specialists from diverse areas of life sciences, creating a dynamic environment for networking and sharing knowledge that fosters new connections and interdisciplinary collaborations. Key topics to be addressed at the event encompass cell biology, structural biology, computational biology and AI, medical biotechnology, plant biotechnology, and the intersection of biotech research with business. Attendees will have a unique opportunity to present their work and stay informed about the latest trends influencing the academic and biotech sectors.

10th Eurobiotech congress is organized jointly by Malopolska Centre of Biotechnology of the Jagiellonian University and Targi w Krakowie Ltd.

We eagerly anticipate your participation, as this is a valuable opportunity to connect and forge relationships across academic fields and with industry professionals.

On behalf of the organizing committee,
Prof. Grzegorz Dubin, Chair
